I'm a part-time designer, full-time developer, playing card collector & rugby fan.

Over **10 years industry experience** working with **WordPress** & **WooCommerce**.

Education

Matriculated high school in 2011, and started my internship later that year.

Experience

Semantica Digital | **2011 - Present**

From an intern to a senior front-end developer today, my growth within the company spans over a decade of continuous learning and hands-on experience.

I've adapted & grown while contributing to our success.

My daily responsibilities can involve engaging in client briefings, ideating practical solutions, creating detailed estimates and overseeing project development from inception to completion.

I actively contribute to successful project outcomes by blending creative thinking with robust development expertise.
